Excel (**Days** 1-15):

agg function: SUM, AVERAGE, COUNT, COUNTA, MAX, MIN
Logical function: IF, AND, OR, IFERROR
Lookup function VLOOKUP, HLOOKUP, XLOOKUP
Text Function: CONCATENATE, LEFT, RIGHT, MID, LEN, TRIM
Data Validation
Conditional Formatting
Sorting and Filtering

Data Cleaning: Remove Duplicates, Text to Columns
Pivot Tables and

Regular Charts
Waterfall, Histogram

Excel Dashboards

My Excel tutorial

Excel Project: ***Create an interactive dashboard using Pivot Tables***, ***Charts***, ***and Conditional Formatting***.

SQL (**Days** 16-40):

Basic Database, DDL,DML,DCL,
CREATE,INSERT,UPDATE,DELETE
SELECT, WHERE, ORDER BY
GROUP BY, HAVING
DISTINCT, COUNT, SUM, AVG, MIN, MAX
SQL Functions: COALESCE, NULLIF, CASE
Joins: INNER, LEFT, RIGHT, FULL, CROSS, SELF JOIN
Subqueries
UNION, INTERSECT, EXCEPT
Window Functions: ROW_NUMBER, RANK, DENSE RANK, PARTITION, LED,LAG
Window Functions using Aggregations - SUM,COUNT,

Project – Download a data and put it in the DB and use it.

Power BI (Days 41-60):

Introduction to Power BI Interface
Importing Data from Different Sources
Data Transformation with Power Query
Creating Relationships between Tables
Creating Basic Visuals: Bar, Line, Pie Charts
Filters and Slicers
Creating Calculated Columns and Measures
DAX Basics: SUM, COUNT, AVERAGE
Time Intelligence in DAX
Power BI Dashboards and Reports
Sharing and Publishing Reports to Power BI Service

YouTube - https://www.youtube.com/watch?v=_Ntg9dGD69E&list=PLVCKeniV3BENxgo8fqfVM-6GBRP-ylk55

***Power BI Project*: *Build an interactive sales dashboard*. *Connect your DB*(*on SQL sections you have used it*) *to Power BI and create a dashboard out of it*.**

Optional:

Python (Days 61-85):

Introduction to Python: Variables, Data Types
Conditional Statements and Loops
Functions
Lists, Tuples, Dictionaries
Working with Files: Reading/Writing Files
NumPy: Arrays and Operations
Pandas: DataFrames, Series, Basic Operations
Data Visualization with Matplotlib and Seaborn

***Python Project*: *Analyze and visualize sales data using Pandas*, *Matplotlib*, *and Seaborn*.**

Leaning:

Exccel - https://excel-practice-online.com/

SQl – 1. https://www.hackerrank.com/domains/sql

2. https://leetcode.com/studyplan/top-sql-50/

Power BI – scenario based question , DAX interview question,

Final Project(86-90):
Guided Project - Pick any of the guided project from internet consists of SQL, Python and Power BI.
2. Unguided Project - Pick a dataset , load it into a DB, write SQL queries to get the data then use Power BI/Python for the final outcome. Or, you can use both.

Tips - Don't forget to revise in every Weekends.
Data source- Kaggle, data.gov
